JPY - GDP (QoQ) (Q4)

JPY - GDP (QoQ) (Q4)

Event	JPY - GDP (QoQ) (Q4)			Description
Actual:				Gross Domestic Product (GDP) measures the change in the inflation-adjusted value of all goods and services produced by the economy. It is the broadest measure of economic activity and the primary indicator of the economy's health. A reading that is stronger than forecast is generally supportive (bullish) for the JPY, while a weaker than forecast reading is generally negative (bearish) for the JPY. Learn More: USDJPY EURJPY

USD - JOLTs Job Openings (Jan)

USD - JOLTs Job Openings (Jan)

Event	USD - JOLTs Job Openings (Jan)			Description
Actual:				A survey done by the US Bureau of Labor Statistics to help measure job vacancies. It collects data from employers about their businesses' employment, job openings, recruitment, hires and separations. JOLTS defines Job Openings as all positions that are open (not filled) on the last business day of the month. A job is "open" only if it meets all three of the following conditions: 1. A specific position exists and there is work available for that position. 2. The job could start within 30 days, whether or not the establishment finds a suitable candidate during that time. 3. There is active recruiting for workers from outside the establishment location that has the opening. A reading that is stronger than forecast is generally supportive (bullish) for the USD, while a weaker than forecast reading is generally negative (bearish) for the USD. Learn More: USDJPY EURUSD

**EUR - U.S. Steel & Aluminum Tariff
Implementation**

EUR - U.S. Steel & Aluminum Tariff Implementation

Event	EUR - U.S. Steel & Aluminum Tariff Implementation			Description
Actual:	-			On February 10, 2025, President Donald J. Trump issued a proclamation reinstating a 25% tariff on steel and certain steel derivatives. Additionally, tariffs on aluminum were raised from 10% to 25%, eliminating all previously established country-specific exemptions and alternative agreements. These tariffs are set to take effect on March 12, 2025. Key Details: • Scope: The tariffs apply to steel and aluminum imports from Argentina, Australia, Brazil, Canada, the European Union, Japan, Mexico, South Korea, Ukraine, and the United Kingdom. All prior exemptions, quotas, and alternative agreements with these nations have been revoked. • Rationale: The administration aims to boost domestic production, citing national security concerns and reducing reliance on foreign metal imports. • Trade Relations: This move represents a major shift in U.S. trade policy, with the potential to strain diplomatic and economic relations with key allies and trading partners. Market Impact: Historically, the imposition of tariffs tends to strengthen (bullish) the USD, while their removal or exemption weakens (bearish) the USD. Learn More: EURUSD USDMXN USDCAD

USD - Core CPI (MoM) (Feb)

USD - Core CPI (MoM) (Feb)

Event	USD - Core CPI (MoM) (Feb)			Description
Actual:				The Core Consumer Price Index (CPI) measures the changes in the price of goods and services, excluding food and energy. The Central bank pays very close attention to this figure in its role of maintaining price stability. Because the Fed believes that core inflation is a better gauge of underlying price pressures, it is more closely watched than overall inflation which tends to be more volatile. A reading that is stronger than forecast is generally supportive (bullish) for the USD, while a weaker than forecast reading is generally negative (bearish) for the USD. Learn More: EURJPY EURUSD

Global - Crude Oil Inventories

Global - Crude Oil Inventories

Event	Global - Crude Oil Inventories			Description
Actual:				The Energy Information Administration's (EIA) Crude Oil Inventories measures the weekly change in the number of barrels of commercial crude oil held by US firms. The level of inventories influences the price of petroleum products, which can have an impact on inflation. If the increase in crude inventories is more than expected, it implies weaker demand and is bearish for crude prices. The same can be said if a decline in inventories is less than expected. If the increase in crude is less than expected, it implies greater demand and is bullish for crude prices. The same can be said if a decline in inventories is more than expected. USD - 10 - Year Note Auction

USD - 10 - Year Note Auction

Event	USD - 10 - Year Note Auction			Description
Actual:				The figures displayed in the calendar represent the yield on the Treasury Note auctioned. U.S. Treasury Notes have maturities of two to ten years. Governments issue treasuries to borrow money to cover the gap between the amount they receive in taxes and the amount they spend to refinance existing debt and/or to raise capital. The rate on a Treasury Note represents the return an investor will receive by holding the note for its entire duration. All bidders receive the same rate at the highest accepted bid. Yield fluctuations should be monitored closely as an indicator of the government debt situation. Investors compare the average rate at auction to the rate at previous auctions of the same security. USD - Initial Jobless Claims

USD - Initial Jobless Claims

Event	USD - Initial Jobless Claims			Description
Actual:				Initial Jobless Claims measures the number of people who filed for unemployment insurance for the first time during the past week. This is the most timely U.S. economic data, but the market impact varies from week to week. A reading that is higher than forecast is generally negative (bearish) for the USD, while a lower than forecast reading is generally supportive (bullish) for the USD. Learn More: USDJPY EURUSD

USD - PPI (MoM) (Feb)

USD - PPI (MoM) (Feb)

Event	USD - PPI (MoM) (Feb)			Description
Actual:				The Producer Price Index (PPI) measures a change in input prices of raw, semi-finished or finished goods and services. If input costs rise, some will be absorbed by the producer and some passed on to the consumer. Conversely, if input costs fall, some of the decline will be enjoyed as wider profit margins by the producer and some will be passed on to the consumer in the form of lower prices. Because PPI impacts consumer prices, it is watched by central bankers as part of fulfilling their mandate of price stability. A reading that is stronger than forecast is generally supportive (bullish) for the USD, while a weaker than forecast reading is generally negative (bearish) for the USD. USD - 30-Year Bond Auction

Event	UK - GDP (MoM) (Jan)			Description
Actual:				Gross Domestic Product (GDP) measures the annualized change in the inflation-adjusted value of all goods and services produced by the economy. It is the broadest measure of economic activity and the primary indicator of the economy's health. A higher than expected reading should be taken as positive/bullish for the GBP, while a lower than expected reading should be taken as negative/bearish for the GBP. Learn More: GBPJPY GBPUSD

EUR - German CPI (MoM) (Feb)

EUR - German CPI (MoM) (Feb)

Event	EUR - German CPI (MoM) (Feb)			Description
Actual:				The Consumer Price Index (CPI) measures the change in the prices of goods and services from the perspective of the consumer. As Germany has the largest output of any country in the euro-zone, the European Central bank pays very close attention to this figure in its role of maintaining price stability. A reading that is stronger than forecast is generally supportive (bullish) for the EUR, while a weaker than forecast reading is generally negative (bearish) for the EUR. Learn More: GBPJPY GBPUSD
