JPY - GDP (QoQ) (Q4) P

JPY - GDP (QoQ) (Q4) P

Event	JPY - GDP (QoQ) (Q4) P			Description
Actual:				Gross Domestic Product (GDP) measures the change in the inflation-adjusted value of all goods and services produced by the economy. It is the broadest measure of economic activity and the primary indicator of the economy's health. A reading that is stronger than forecast is generally supportive (bullish) for the JPY, while a weaker than forecast reading is generally negative (bearish) for the JPY. Learn More: USDJPY EURJPY

AUD - RBA Interest Rate Decision (Feb)

AUD - RBA Interest Rate Decision (Feb)

Event	AUD - RBA Interest Rate Decision (Feb)			Description
Actual:				According to Bloomberg, the RBA is expected to cut rates by 25 basis points, from 4.35% to 4.10%, following a decline in Australian inflation from 2.8% in Q3 2024 to 2.4% in Q4 2024. Investors will closely watch the RBA's press conference for insights into future monetary policy. Any signals from the RBA Governor regarding an accelerated pace of rate cuts could weaken the Australian dollar against major currencies like the US dollar. Learn More: AUDJPY AUDUSD

NZD - RBNZ Interest Rate Decision

NZD - RBNZ Interest Rate Decision

Event	NZD - RBNZ Interest Rate Decision			Description
Actual:				The Reserve Bank of New Zealand (RBNZ) governor decides where to set the rate after consulting senior bank staff and external advisers. As short term interest rates are an important determinant of currency valuation, traders watch interest rate changes closely. A reading that is stronger than forecast is generally supportive (bullish) for the NZD, while a weaker than forecast reading is generally negative (bearish) for the NZD. Learn More: NZDJPY NZDUSD

Index (Feb)**

USD - Philadelphia Fed Manufacturing Index (Feb)

Event	USD - Philadelphia Fed Manufacturing Index (Feb)			Description
Actual:				The Philadelphia Federal Reserve Manufacturing Index measures the relative level of business conditions amongst manufacturers in the Federal reserve district. A level above zero on the index indicates improving conditions; below indicates worsening conditions. The data is compiled from a survey of about 250 manufacturers in the Philadelphia Federal Reserve district. A reading that is stronger than forecast is generally supportive (bullish) for the USD, while a weaker than forecast reading is generally negative (bearish) for the USD. Learn More: USDJPY EURUSD

Global - Crude Oil Inventories

Global - Crude Oil Inventories

Event	Global - Crude Oil Inventories			Description
Actual:				The Energy Information Administration's (EIA) Crude Oil Inventories measures the weekly change in the number of barrels of commercial crude oil held by US firms. The level of inventories influences the price of petroleum products, which can have an impact on inflation. If the increase in crude inventories is more than expected, it implies weaker demand and is bearish for crude prices. The same can be said if a decline in inventories is less than expected. If the increase in crude is less than expected, it implies greater demand and is bullish for crude prices. The same can be said if a decline in inventories is more than expected. USD - Manufacturing PMI (Feb) P

USD - Manufacturing PMI (Feb) P

Event	USD - Manufacturing PMI (Feb) P			Description
Actual:				The Manufacturing Purchasing Managers' Index (PMI) is a diffusion index incorporating survey results provided by manufacturing firms throughout the country. A reading above fifty suggests the manufacturing sector is expanding, while a reading below fifty suggests the manufacturing sector is in contraction. Policymakers and traders watch these surveys closely as purchasing managers usually have early access to data about their company's performance, rather than waiting for the hard data to emerge. While manufacturing accounts for a far smaller percentage of economic output than services, it is far more cyclical and is therefore a useful indicator of where in the economic cycle the economy is currently situated. A reading that is stronger than forecast is generally supportive (bullish) for the USD while a weaker than forecast reading is generally negative (bearish) for the USD. Learn More: USDJPY EURUSD

USD - Services PMI (Feb) P

USD - Services PMI (Feb) P

Event	USD - Services PMI (Feb) P			Description
Actual:				The Service PMI release is published monthly by Markit Economics. The data are based on surveys of over 400 executives in private sector service companies. The surveys cover transport and communication, financial intermediaries, business and personal services, computing & IT, hotels and restaurants. An index level of 50 denotes no change since the previous month, while a level above 50 signals an improvement, and below 50 indicates a deterioration. A reading that is stronger than forecast is generally supportive (bullish) for the USD, while a weaker than forecast reading is generally negative (bearish) for the USD. Learn More: USDJPY EURUSD

Appendix: Key Economic & Analytical Concepts

Economic Data Interpretation

- **Forecast Vs. Actual:** Comparing predicted values with released data
- **Previous Reading:** Last reported value, used as a benchmark
- **Market Impact:** How releases affect financial markets

Average True Range (ATR)

- **Definition:** A technical indicator that measures market volatility
- **Calculations:**
 - Calculate True Range (TR) for each period:
 - $TR = \max [(high - low), abs(high - previous\ close), abs(low - previous\ close)]$
 - $ATR = \text{Simple moving average of TR over } N \text{ periods (typically 14)}$
- **Interpretation:**
 - Higher ATR = Higher Volatility
 - Lower ATR = Lower Volatility
- **Usage in Our Analysis:**
 - Helps standardize price movements across different market conditions
 - Forms the basis of our Volatility Unit Calculations

Volatility Unit

- **Formula:** $(ATR * multiple) + Spread$ (multiple is typically 1.5)
- **Purpose:** Standardizes price movements

Price Movements

- **Max Movement:** Largest upward price move after event
- **Min Movement:** Largest downward price move after event
- Both measured in Volatility Units

Using This Analysis

- Analyze volatility across different economic releases
- Identify patterns in market reactions
- Assess importance of economic indicators based on market impact
