EUR - CPI (YoY) (Jan) P

EUR - CPI (YoY) (Jan) P

Event	EUR - CPI (YoY) (Jan) P			Description
Actual:				The Consumer Price Index (CPI) measures the change in the prices of goods and services contained in a basket of consumer items. The Central bank pays very close attention to this figure in its role of maintaining price stability. A reading that is stronger than forecast is generally supportive (bullish) for the EUR, while a weaker than forecast reading is generally negative (bearish) for the EUR. Learn More: EURJPY, EURUSD

USD - Manufacturing PMI (Jan)

USD - Manufacturing PMI (Jan)

Event	USD - Manufacturing PMI (Jan)			Description
Actual:				The Manufacturing Purchasing Managers' Index (PMI) is a diffusion index incorporating survey results provided by manufacturing firms throughout the country. A reading above fifty suggests the manufacturing sector is expanding, while a reading below fifty suggests the manufacturing sector is in contraction. Policymakers and traders watch these surveys closely as purchasing managers usually have early access to data about their company's performance, rather than waiting for the hard data to emerge. While manufacturing accounts for a far smaller percentage of economic output than services, it is far more cyclical and is therefore a useful indicator of where in the economic cycle the economy is currently situated. A reading that is stronger than forecast is generally supportive (bullish) for the USD while a weaker than forecast reading is generally negative (bearish) for the USD. Learn More: USDJPY, EURUSD

USD – ISM Manufacturing PMI (Jan)

USD – ISM Manufacturing PMI (Jan)

Event	USD - ISM Manufacturing PMI (Jan)			Description
Actual:				The Institute of Supply Management (ISM) Manufacturing Purchasing Managers Index (PMI) Report on Business is based on data compiled from monthly replies to questions asked of purchasing and supply executives in over 400 industrial companies across the United States. For each of the indicators measured (New Orders, Backlog of Orders, New Export Orders, Imports, Production, Supplier Deliveries, Inventories, Customers Inventories, Employment, and Prices), a diffusion index is calculated by adding the percent of positive responses plus one-half of those responding the same (considered positive). The resulting single index number is then seasonally adjusted. The PMI is a composite index based on the seasonally adjusted diffusion indices for five of the indicators with differing weights: New Orders --30% Production --25% Employment --20% Supplier Deliveries --15% and Inventories -- 10%. A reading that is stronger than forecast is generally supportive (bullish) for the USD, while a weaker than forecast reading is generally negative (bearish) for the USD. Learn More: USDJPY, EURUSD

USD - JOLTs Job Openings (Dec)

USD - JOLTs Job Openings (Dec)

Event	USD - JOLTs Job Openings (Dec)			Description
Actual:				A survey done by the US Bureau of Labor Statistics to help measure job vacancies. It collects data from employers about their businesses' employment, job openings, recruitment, hires and separations. JOLTS defines Job Openings as all positions that are open (not filled) on the last business day of the month. A job is "open" only if it meets all three of the following conditions: 1. A specific position exists and there is work available for that position. 2. The job could start within 30 days, whether or not the establishment finds a suitable candidate during that time. 3. There is active recruiting for workers from outside the establishment location that has the opening. A reading that is stronger than forecast is generally supportive (bullish) for the USD, while a weaker than forecast reading is generally negative (bearish) for the USD. Learn More: USDJPY, EURUSD

USD - Services PMI (Jan)

USD - Services PMI (Jan)

Event	USD - Services PMI (Jan)			Description
Actual:				The Service PMI release is published monthly by Markit Economics. The data are based on surveys of over 400 executives in private sector service companies. The surveys cover transport and communication, financial intermediaries, business and personal services, computing & IT, hotels and restaurants. An index level of 50 denotes no change since the previous month, while a level above 50 signals an improvement, and below 50 indicates a deterioration. A reading that is stronger than forecast is generally supportive (bullish) for the USD, while a weaker than forecast reading is generally negative (bearish) for the USD. Learn More: USDJPY, EURUSD

USD - Non-ISM Manufacturing PMI (Jan)

USD - Non-ISM Manufacturing PMI (Jan)

Event	USD - Non-ISM Manufacturing PMI (Jan)			Description
Actual:				The Institute of Supply Management (ISM) Non-Manufacturing Purchasing Managers' Index (PMI) (also known as the ISM Services PMI) report on Business, is based on data compiled from monthly replies to questions asked of more than 370 purchasing and supply executives in over 62 different industries.
Forecast:	-			
Previous:	54.10			
Time (GMT):	15:00			
Release Date	Actual	Forecast	Previous	The NMI is a composite index based on the diffusion indexes for four of the indicators with equal weights: Business Activity (seasonally adjusted), New Orders (seasonally adjusted), Employment (seasonally adjusted) and Supplier Deliveries. A reading above 50 percent indicates the non-manufacturing sector economy is generally expanding; below 50 percent indicates the non-manufacturing sector is generally contracting. Given the large proportion of the US economy engaged in the services sector, this report offers insights into the health of the overall US economy. A reading that is stronger than forecast is generally supportive (bullish) for the USD, while a weaker than forecast reading is generally negative (bearish) for the USD. Learn More: USDJPY, EURUSD

(Jan)**

USD - Non-ISM Manufacturing Prices (Jan)

Event	USD - Non-ISM Manufacturing Prices (Jan)			Description
Actual:				The Institute of Supply Management (ISM) Non-Manufacturing Purchasing Managers' Index (PMI) (also known as the ISM Services PMI) report on Business, is based on data compiled from monthly replies to questions asked of more than 370 purchasing and supply executives in over 62 different industries. The Prices Paid subcategory is a diffusion index calculated by adding the percent of responses indicating they paid more for inputs plus one-half of those responding that they paid the same for inputs. The resulting single index number is then seasonally adjusted. The Prices Paid diffusion index is one of a number of indicators pointing to the degree of inflationary pressures in the economy. A reading that is stronger than forecast is generally supportive (bullish) for the USD, while a weaker than forecast reading is generally negative (bearish) for the USD. Learn More: USDJPY, EURUSD

Appendix: Key Economic & Analytical Concepts

Economic Data Interpretation

- **Forecast Vs. Actual:** Comparing predicted values with released data
- **Previous Reading:** Last reported value, used as a benchmark
- **Market Impact:** How releases affect financial markets

Average True Range (ATR)

- **Definition:** A technical indicator that measures market volatility
- **Calculations:**
 - Calculate True Range (TR) for each period:
 - $TR = \max [(high - low), abs(high - previous\ close), abs(low - previous\ close)]$
 - $ATR = \text{Simple moving average of TR over } N \text{ periods (typically 14)}$
- **Interpretation:**
 - Higher ATR = Higher Volatility
 - Lower ATR = Lower Volatility
- **Usage in Our Analysis:**
 - Helps standardize price movements across different market conditions
 - Forms the basis of our Volatility Unit Calculations

Volatility Unit

- **Formula:** $(ATR * multiple) + Spread$ (multiple is typically 1.5)
- **Purpose:** Standardizes price movements

Price Movements

- **Max Movement:** Largest upward price move after event
- **Min Movement:** Largest downward price move after event
- Both measured in Volatility Units

Using This Analysis

- Analyze volatility across different economic releases
- Identify patterns in market reactions
- Assess importance of economic indicators based on market impact
