US Manufacturing PMI (Dec)

US Manufacturing PMI (Dec)

Event	US Manufacturing PMI (Dec)			Description
Actual:				The Manufacturing Purchasing Managers' Index (PMI) is a diffusion index incorporating survey results provided by manufacturing firms throughout the country. A reading above fifty suggests the manufacturing sector is expanding, while a reading below fifty suggests the manufacturing sector is in contraction. Policymakers and traders watch these surveys closely as purchasing managers usually have early access to data about their company's performance, rather than waiting for the hard data to emerge. While manufacturing accounts for a far smaller percentage of economic output than services, it is far more cyclical and is therefore a useful indicator of where in the economic cycle the economy is currently situated. A reading that is stronger than forecast is generally supportive (bullish) for the USD while a weaker than forecast reading is generally negative (bearish) for the USD. Historical impact on Assets: USDJPY
Forecast:	49.40			
Previous:	49.70

US Services PMI (Dec)

US Services PMI (Dec)

Event	US Services PMI (Dec)			Description
Actual:				
Forecast:	55.70			
Previous:	56.10			
Time (GMT):	14:45			
Release Date	Actual	Forecast	Previous	The Service PMI release is published monthly by Markit Economics. The data are based on surveys of over 400 executives in private sector service companies. The surveys cover transport and communication, financial intermediaries, business and personal services, computing & IT, hotels and restaurants. An index level of 50 denotes no change since the previous month, while a level above 50 signals an improvement, and below 50 indicates a deterioration. A reading that is stronger than forecast is generally supportive (bullish) for the USD, while a weaker than forecast reading is generally negative (bearish) for the USD. Historical impact on Assets: USDJPY

CAD Core CPI (YoY) (Nov)

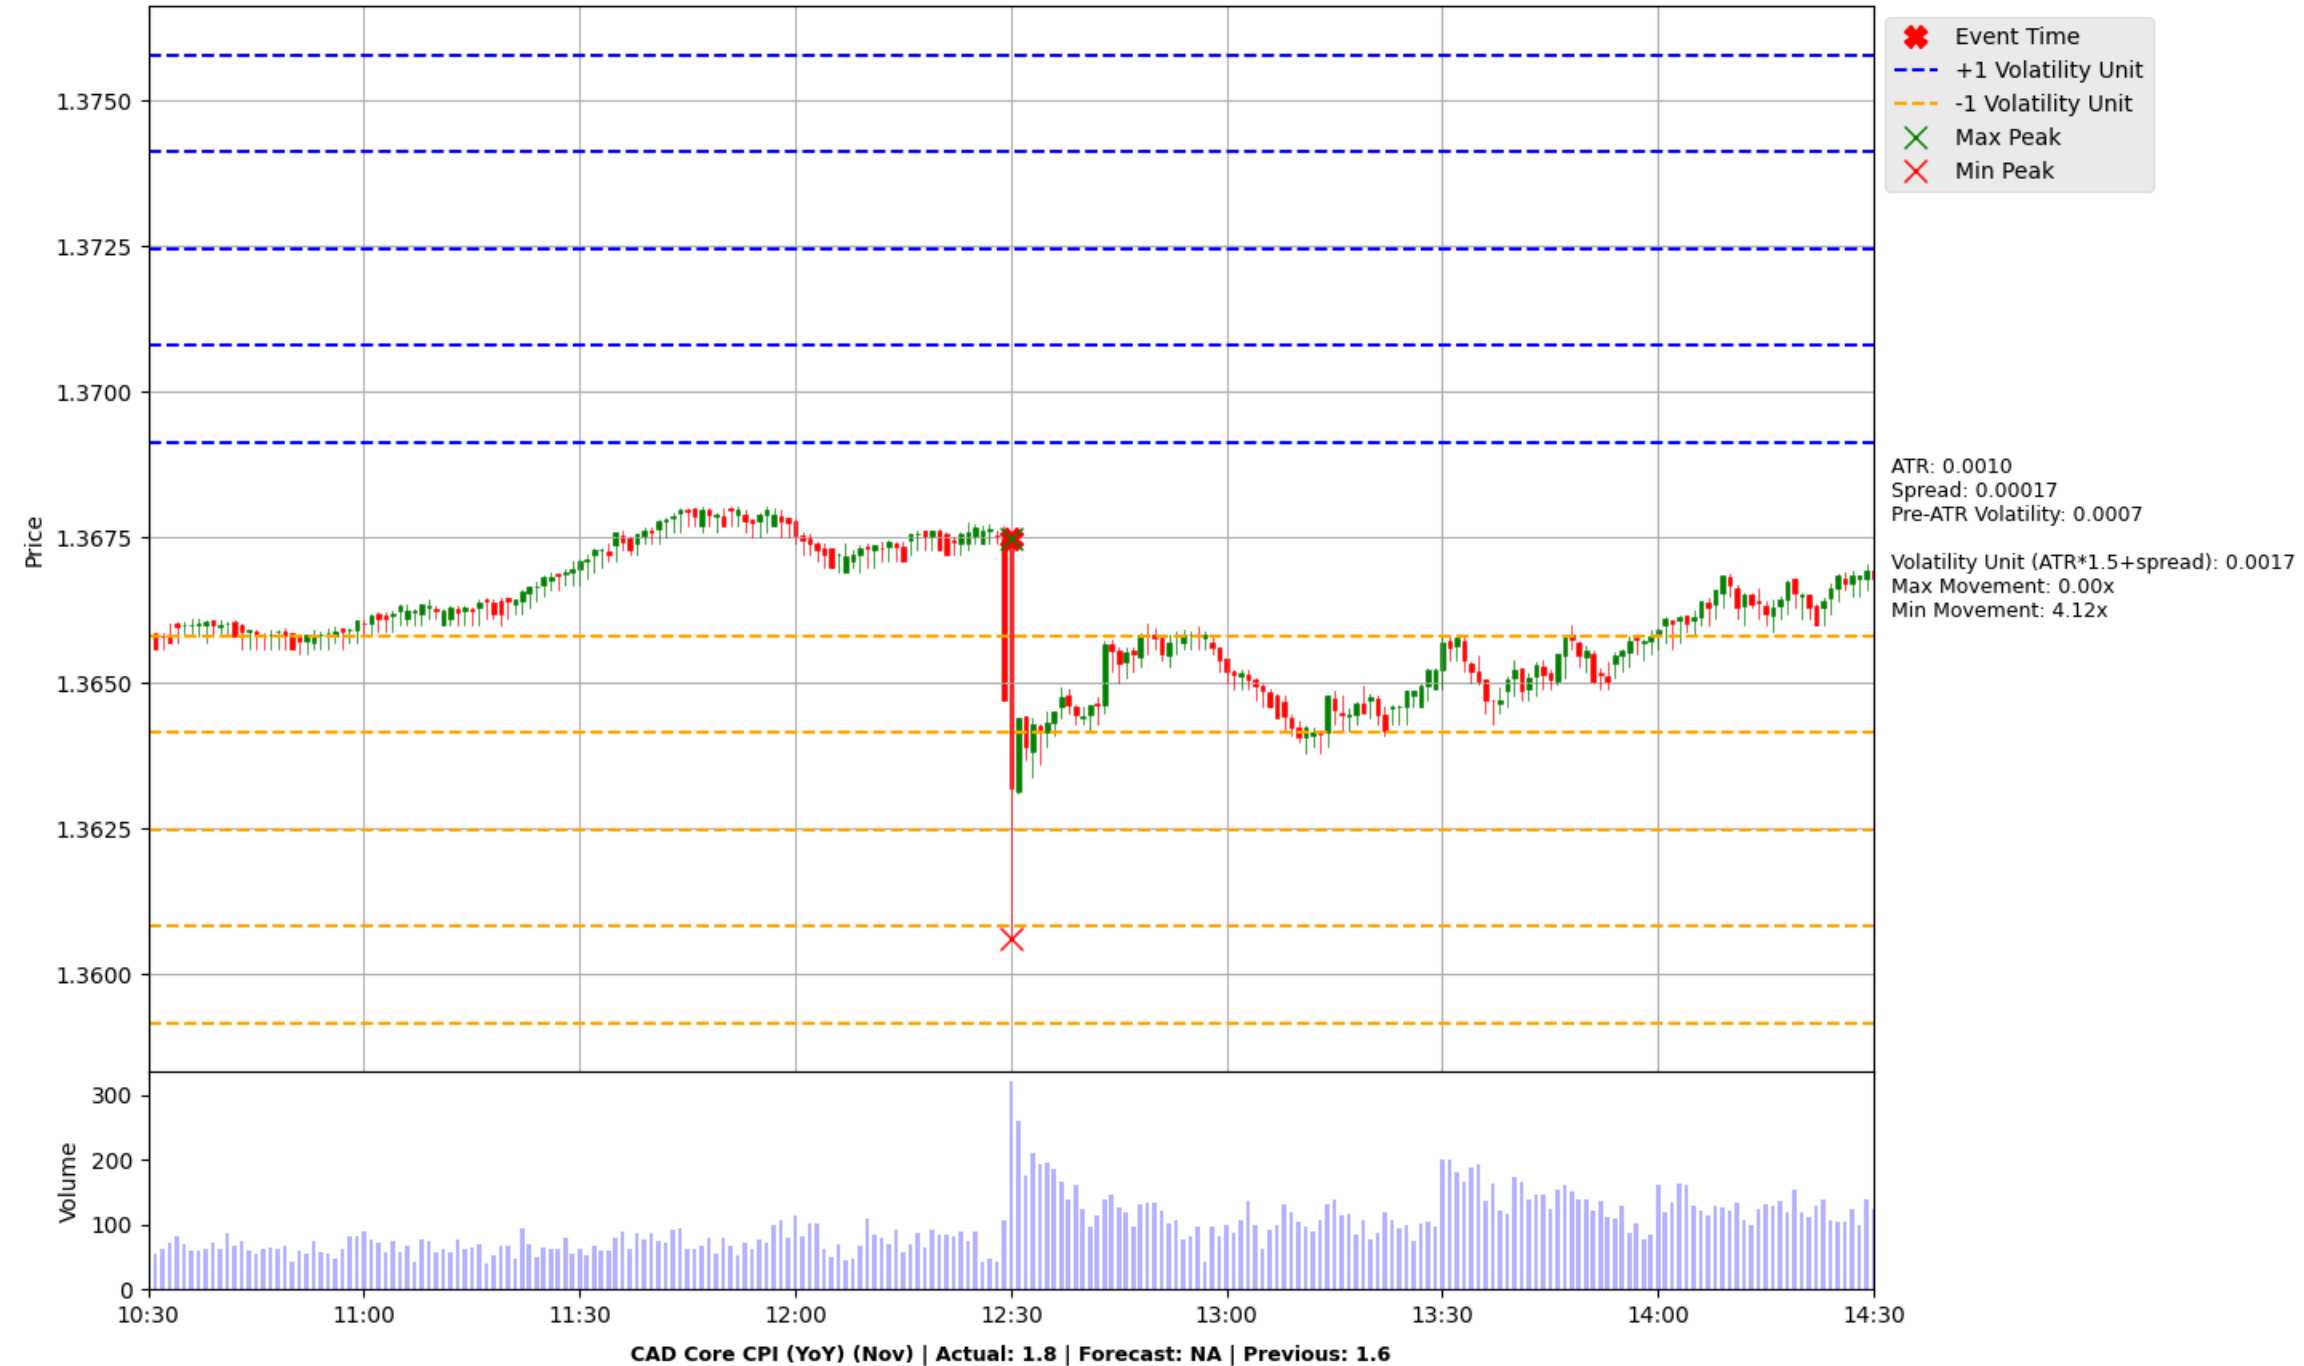

CAD Core CPI (YoY) (Nov)

Event	CAD Core CPI (YoY) (Nov)			Description
Actual:				According to Bloomberg, Canadian inflation is projected to decline from 2.0% in October to 1.9% in November, while core inflation (excluding energy and food) expected to ease from 2.6% to 2.5%. The Bank of Canada reduced interest rates by 50 basis points in its most recent meeting, lowering the rate from 3.75% to 3.25%. With inflation continuing to decline, there remains potential for further rate cuts in upcoming meetings. Markets currently estimate a 65% likelihood of a 25-basis-point reduction at the January meeting. However, lower-than-expected inflation data could increase expectations for this rate cuts, potentially weakening the Canadian dollar against major currencies like the US dollar. Crude Oil Inventories

Crude Oil Inventories

Event	Crude Oil Inventories			Description
Actual:				The Energy Information Administration's (EIA) Crude Oil Inventories measures the weekly change in the number of barrels of commercial crude oil held by US firms. The level of inventories influences the price of petroleum products, which can have an impact on inflation. If the increase in crude inventories is more than expected, it implies weaker demand and is bearish for crude prices. The same can be said if a decline in inventories is less than expected. If the increase in crude is less than expected, it implies greater demand and is bullish for crude prices. The same can be said if a decline in inventories is more than expected. FOMC Economic Projections

FOMC Economic Projections

Event	FOMC Economic Projections			Description
Actual:				Bloomberg anticipates that the Fed will lower interest rates by 25 basis points, bringing them down from 4.75% to 4.50%. Investors will pay close attention to the "dot plot", which reflects Federal Reserve members' projections for future rate changes. If the dot plot signals more aggressive rate cuts in 2025, it could impact major US stock indices, including US2000. Additionally, traders will tune in the Federal Reserve Chairman Jerome Powell's press conference for insights into the Fed's monetary policy outlook for the coming year. BoJ Interest Rate Decision

BoJ Interest Rate Decision

Event	BoJ Interest Rate Decision			Description
Actual:				Bank of Japan (BOJ) policy board publishes its decision about where to set the target overnight rate. As short term interest rates are an important determinant of currency valuation, traders watch interest rate changes closely. A reading that is stronger than forecast is generally supportive (bullish) for the JPY, while a weaker than forecast reading is generally negative (bearish) for the JPY. Historical impact on Assets: USDJPY
Forecast:	0.25%

**US Philadelphia Fed Manufacturing
Index (Dec)**

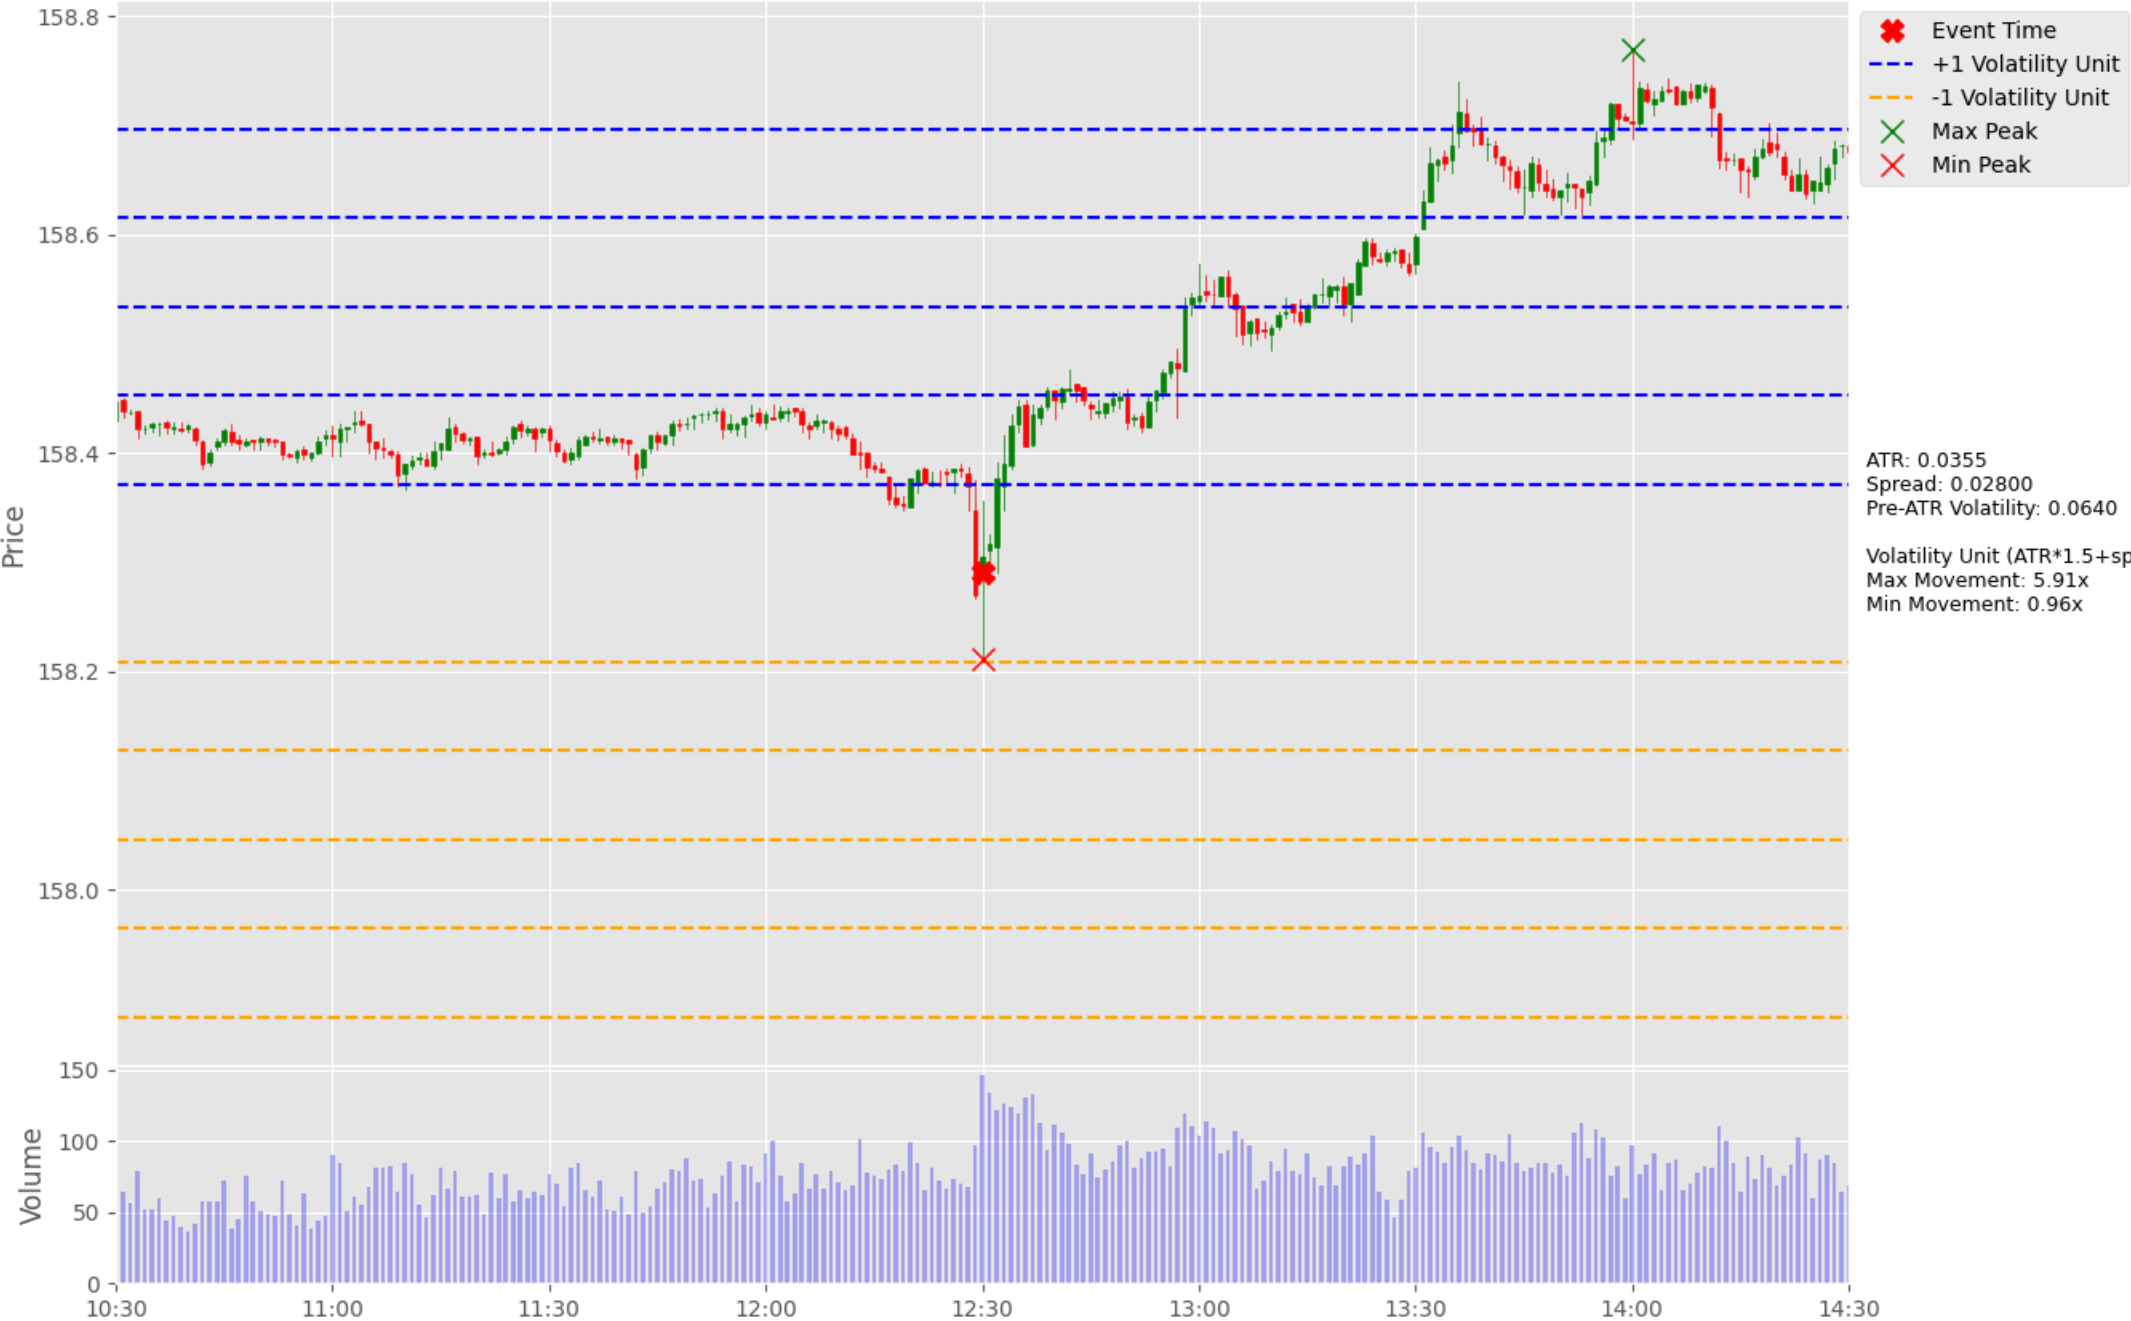

US Philadelphia Fed Manufacturing Index (Dec)

Event	US Philadelphia Fed Manufacturing Index (Dec)			Description
Actual:				The Philadelphia Federal Reserve Manufacturing Index measures the relative level of business conditions amongst manufacturers in the Federal reserve district. A level above zero on the index indicates improving conditions; below indicates worsening conditions. The data is compiled from a survey of about 250 manufacturers in the Philadelphia Federal Reserve district. A reading that is stronger than forecast is generally supportive (bullish) for the USD, while a weaker than forecast reading is generally negative (bearish) for the USD. US Core PCE Price Index (MoM) (Nov)

US Core PCE Price Index (MoM) (Nov)

Event	US Core PCE Price Index (MoM) (Nov)			Description
Actual:				The Core Personal Consumption Expenditure (PCE) Price Index measures the changes in the price of goods and services purchased by consumers for the purpose of consumption, excluding food and energy. Unlike the fixed-weight CPI, PCE is chain-weighted and thus adjusts to changing consumer behaviour. Core PCE is the Fed's preferred inflation measure and thus receives greater attention. A reading that is stronger than forecast is generally supportive (bullish) for the USD, while a weaker than forecast reading is generally negative (bearish) for the USD. Historical impact on Assets: USDJPY
Forecast:	0.20%

US Core PCE Price Index (YoY) (Nov)

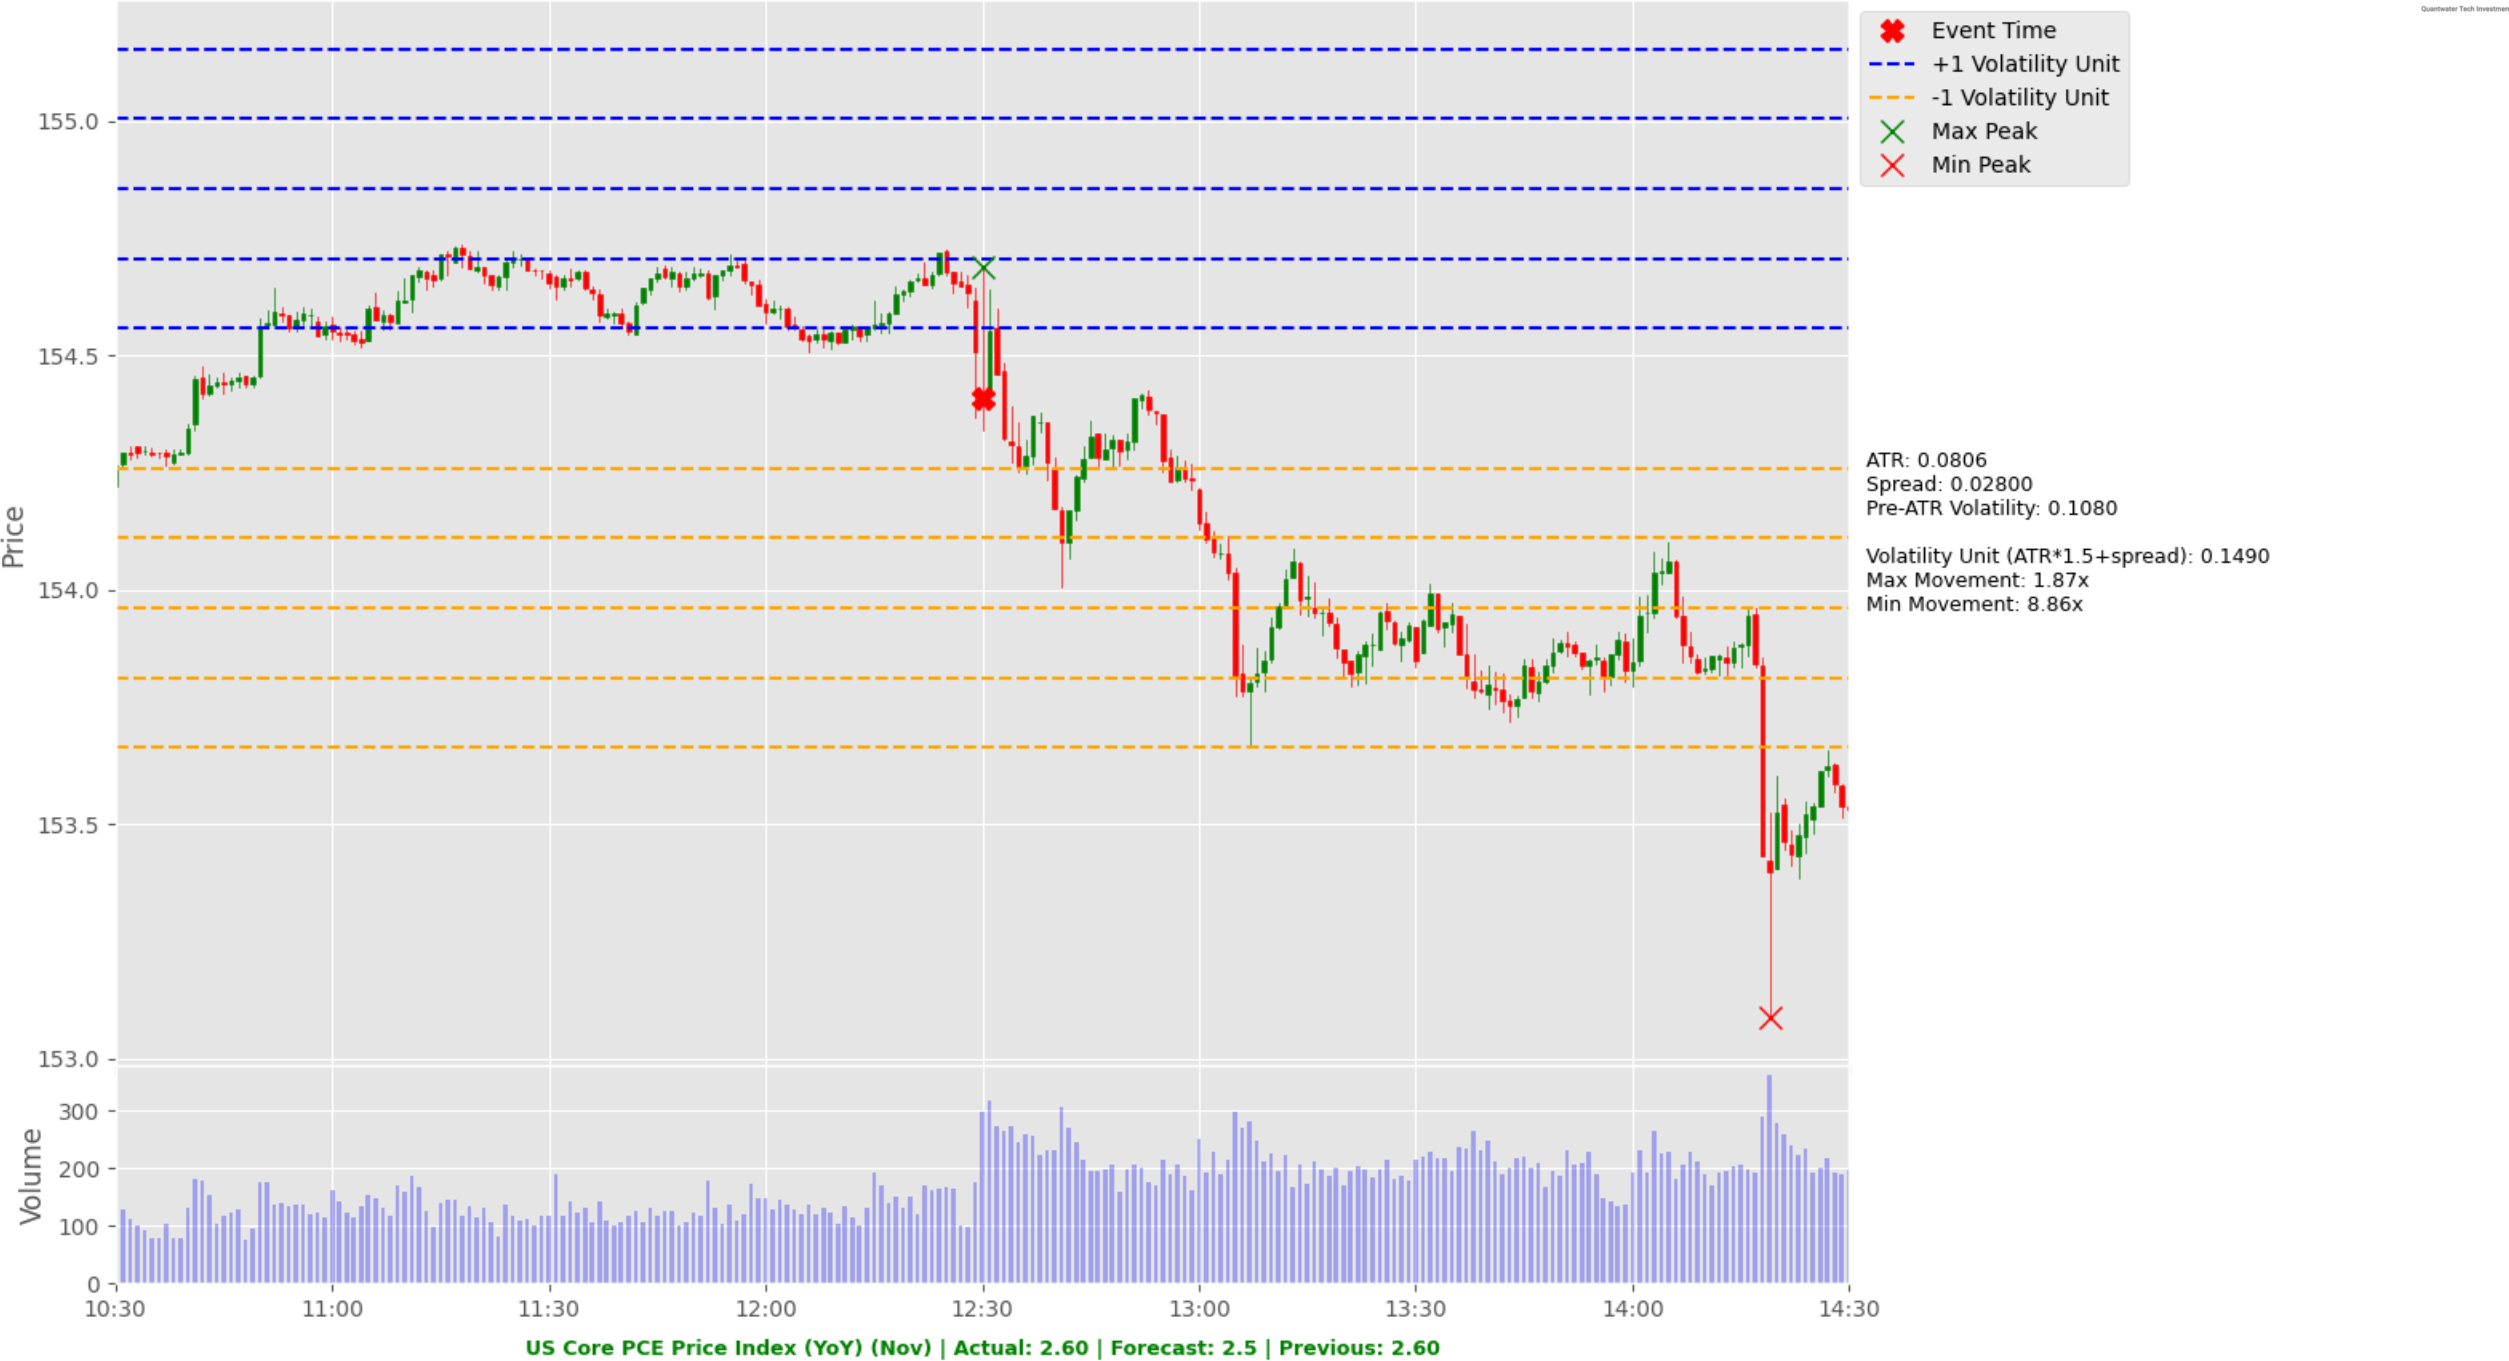

US Core PCE Price Index (YoY) (Nov)

Event	US Core PCE Price Index (YoY) (Nov)			Description
Actual:				The Core PCE price Index is the less volatile measure of the PCE price index which excludes the more volatile and seasonal food and energy prices. The impact on the currency may go both ways, a rise in inflation may lead to a rise in interest rates and a rise in local currency, on the other hand, during recession, a rise in inflation may lead to a deepened recession and therefore a fall in local currency. Historical impact on Assets: USDJPY

Appendix: Key Economic & Analytical Concepts

Economic Data Interpretation

- **Forecast Vs. Actual:** Comparing predicted values with released data
- **Previous Reading:** Last reported value, used as a benchmark
- **Market Impact:** How releases affect financial markets

Average True Range (ATR)

- **Definition:** A technical indicator that measures market volatility
- **Calculations:**
 - Calculate True Range (TR) for each period:
 - $TR = \max [(high - low), abs(high - previous\ close), abs(low - previous\ close)]$
 - $ATR = \text{Simple moving average of TR over } N \text{ periods (typically 14)}$
- **Interpretation:**
 - Higher ATR = Higher Volatility
 - Lower ATR = Lower Volatility
- **Usage in Our Analysis:**
 - Helps standardize price movements across different market conditions
 - Forms the basis of our Volatility Unit Calculations

Volatility Unit

- **Formula:** $(ATR * multiple) + Spread$ (multiple is typically 1.5)
- **Purpose:** Standardizes price movements

Price Movements

- **Max Movement:** Largest upward price move after event
- **Min Movement:** Largest downward price move after event
- Both measured in Volatility Units

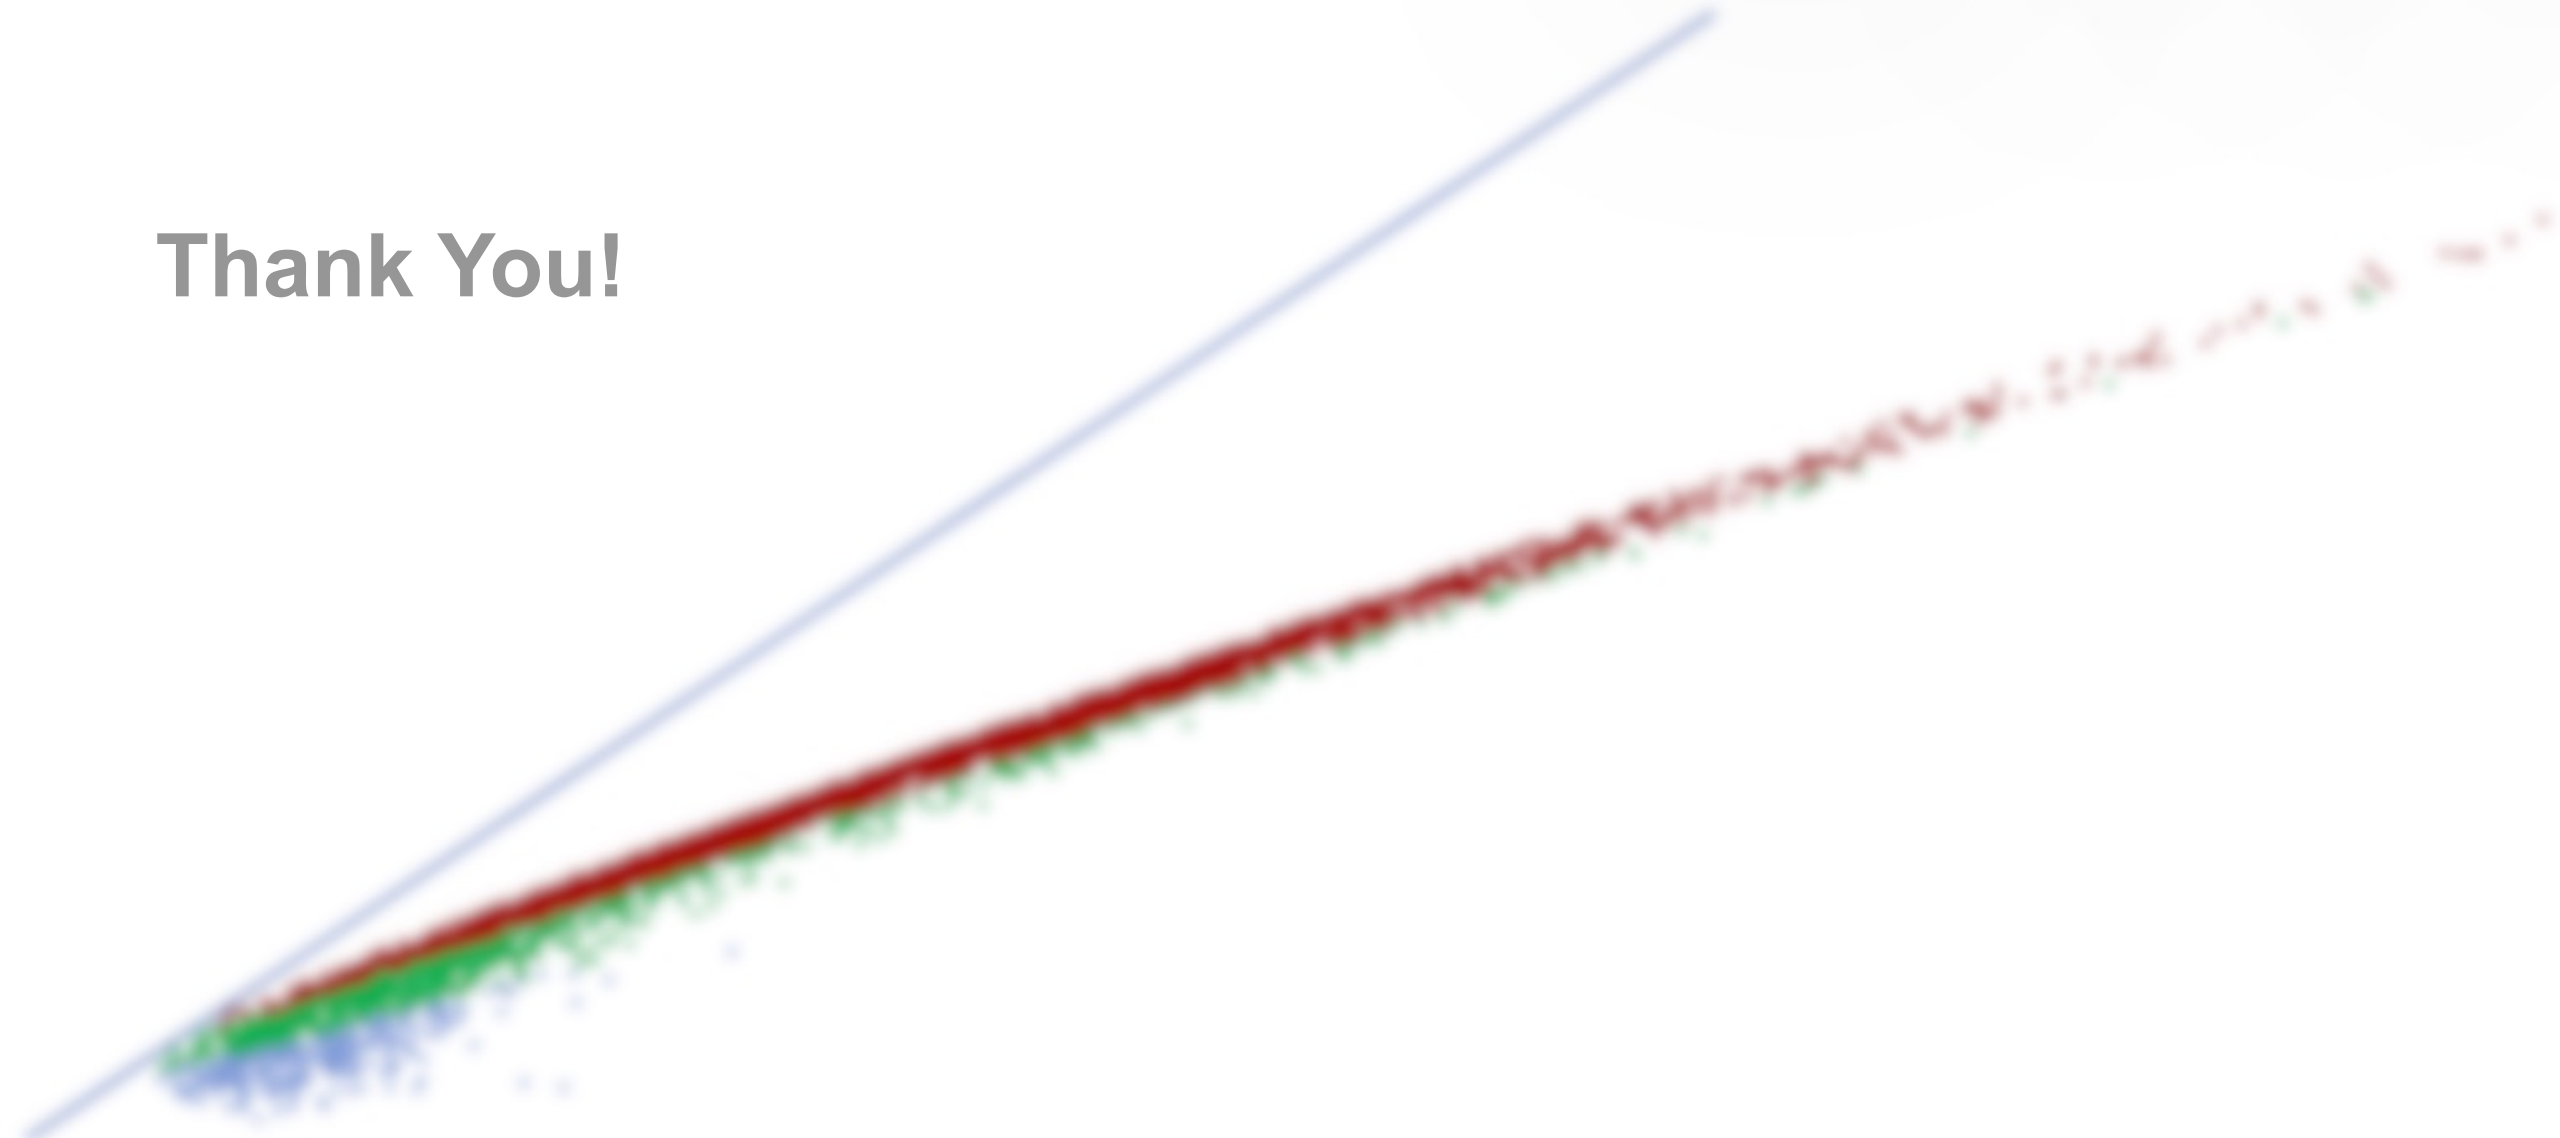

Using This Analysis

- Analyze volatility across different economic releases
- Identify patterns in market reactions
- Assess importance of economic indicators based on market impact
